Master of Science in Artificial Intelligence at University of Georgia. Hands on experienced in **machine learning**, **deep learning**, **natural language processing** and **image processing**. Curious about research and motivated in developing end products. Interested in **data science** as career goal.

Education

M.S. in Artificial Intelligence	University of Georgia	*Athens, GA*	*Aug. 2017 - Exp. Aug. 2019*
B.S.(Hons) in Artificial Intelligence	University of Liverpool	*Liverpool, UK*	*Sep. 2015 - June. 2017*
B.S. in Information and Computer Science	XJTLU	*Suzhou, China*	*Sep. 2013 - June. 2015*

Data Science Experience

Medical Video Cilia Segmentation (Image Analysis and Signal Processing) *Athens, GA*

Dept. of Artificial Intelligence *On-going*

- Combine Long Short-term Memory(LSTM) models with Fourier Transform to learn cilia beating frequencies
- Work Convolutional Neurion Network(CNN) model into LSTM to include spatial information supporting segmentation

Kaggle Competition: Inclusive Images Challenge (Multi-label Image Classification) ⚲ *Athens, GA*

Dept. of Artificial Intelligence *Sep. 2018 - Dec. 2018*

- Prepare balance data from original unbalanced data
- Built and applied new multi-layered CNN model with Tensorflow for multi-layered ground truth labels

Web Traffic Time Series Forecasting of Wiki pages (Time series Analysis) ⚲ *Athens, GA*

Dept. of Artificial Intelligence *April 2018 - May 2018*

- Applied Long short-term memory (LSTM) model with Keras to 145k wiki pages in python for analysis and prediction

Scalable Document Classification on Apache Spark (Natural Language Processing) ⚲ *Athens, GA*

Dept. of Artificial Intelligence *Jan. 2018*

- Features mining from text data, feature cleaning with NLTK
- Applied Navie Bayes classifier on Spark in python

Real-time Eye and Pupil Tracking (Image Processing, IOS App development) *Liverpool, UK*

Dept. of Computer Science *Oct. 2016 - June 2017*

- Collaborated with local clinic for developing pupil tracking APP in Object-C on iPad to support stroke diagnose.
- Applied real-time face, eye detection and analysis of image gradient to achieve pupil detection and tracking with OpenCV in C++ (embedded in Object-C).

Work Experience

Data Scientist Student Assistant *Athens, GA*

University of Georgia *Oct. 2018 - PRESENT*

- Data engineering transforming raw data into clean and constructed data.
- Construct interactive data visualization for client using Qlik.

Image Processing Summer Intern *Shenzhen, China*

Coherent AI *June 2018 - Aug. 2018*

- Vehicle detection in traffic images with CNN model.
- Built and applied new CNN model for hyperspectral image reconstruction from 3 channel images.

Web IT and Volunteer *Liverpool, UK*

The Brain Charity *Oct. 2015 - June 2017*

- Front-end web development with HTML, CSS and Javascript using the Joomla content management system.

Skills

Programming	Python, JAVA, C/C++, Javascript, Objective C
Data Science tools	TensorFlow, Opencv, Numpy, Scikit-learn, Scikit-image, NLTK, Pandas
Data Visualization	Matplotlib, Qlik, Tableau, web
Other	HTML/CSS, SQL, Git
